DMAC Webinar Series

www.dmac-solutions.net

The Data Resources Management technical assistance and support package is a year-long model for campus and district data users. Data users engage in an intentional support model that provides them with the user with data-driven practices to increase efficiency and usability for data resource systems. A Data Resource Specialist will support campus and district teams throughout the year with professional learning and implementation support for their data system.

Quick and easy webinars

- Learn how to use the DMAC applications to their full potential!

- Attendees are welcome to attend any or all webinar sessions that meet their needs!
