

# FIBER11 Internet Access Contract 2022-2023

Note: Due to various factors, including the volume of participation from districts, contract negotiations for products and services being purchased and delivered within this contract, possible funding changes for districts or ESC Region 11, and other factors, this contract is offered in good faith but does not become binding until September 1, 2022, on either the district or ESC Region 11. This contract is contingent upon the continued availability of appropriations and is subject to cancellation by either party upon thirty (30) days' written notice to the other party. Payment for valid fees or charges rendered by the ESC Region 11 prior to written notice of termination shall be due to ESC Region 11. Early acceptance of this contract is necessary so that ESC Region 11 can plan and prepare to deliver these services. An alternative contract may be offered if this contract cannot be delivered as stated.

**Fiber Infrastructure for Broadband Enhancement in Region 11 (FIBER11)** is an enhanced K-12 region-wide broadband infrastructure created to promote educational excellence in instruction, services, and resources through a collaborative partnership among school districts that:

- Creates a region-wide K-12 consortium to gain a competitive price advantage on FIBER11 infrastructure
- Provides an equitable financial model for each school district based on an average consortium E-rate discount
- Grants access to a high-speed, region-wide network of school districts with the ability to form partnerships, such as disaster recovery connectivity, equipment colocation, etc.
- Establishes a dedicated fiber network that allows districts the flexibility to easily maintain and/or increase internet capacity and connectivity
- This unique partnership offers increased collaboration and credibility to provide improved, quality services to campuses through an economical and efficient infrastructure, resulting in the highest achievable bandwidth at the lowest cost for unlimited teaching and learning potential far into the future.

## Services Provided

### Internet Access Service

- The ESC Region 11 Consortium's FIBER11 service provides the district with a raw, unfiltered DIA circuit with 10 Gigabits per second of bandwidth per circuit.
- The FIBER11 Network Operations Center (NOC) owns and provides a managed Cisco ASR920 router at the edge of the FIBER11 network with a 10Gb fiber or 1Gb copper handoff into District's layer 3, NAT-capable edge device (firewall, switch, or router).
- The FIBER11 NOC distributes this bandwidth from its core Datacenter located at 1451 S. Cherry Lane, White Settlement, TX 76108 through two diverse 100Gb DIA links to the Tier 1 ISP.
